

Feedback on Beth Seyda's Presentations

Wonderful presentation – straight from the heart – the exact perspective medical personnel need to hear so as not to forget why we are here. Thank you.

Everything I hoped to take away from this conference, I learned from this speaker. She did a great job. I wish that more moms would give feedback so that we could identify more needs for improvement in our practice.

Thank you for your poignant presentation. I learned so much. Thank you for your courage and for teaching us something new.

Beth, thank you!! Your perspective helps me with my daily work as a NICU nurse. I appreciate your comments and I can see I have been doing some things right and I still have areas to improve on.

Handouts very beneficial. True lesson in a mother's perspective. Many learning tools to pass on to others.

Beth had expressed herself very well and let us know when and how to help. Her handouts will be very beneficial for references.

Beth Seyda was very, very excellent at getting her points across from the human perspective. I learned more than I ever dreamed. She is a beautiful human and touching person.

I am always grateful for the strength of bereaved parents to help us care providers learn. Thank you Beth!!

This was very insightful into how the parent feels. Thank you for this perspective.

This was one of the most touching and sensitive presentations. Very genuine presenter.

Beth was very open and honest which made her presentation valuable to me.

Excellent presentation in its power and clarity. Very well done.

Wonderful presentation of personal experience and using this as a spring board to helping others.

Very courageous to share story. Nice to incorporate personal story plus practical information.

Excellent! Very helpful ideas to help me as a nurse care for bereaved parents.

It makes such a difference when the speaker has the "life experience" of the topic. This was great!
